PARAGRAPH 1: What differs GS PDFFlow Library from any other PDF generation library out there?Any library that is available on the market right now would be a direct competitor to Haru we base GS PDFFlow Library on. Don't think of GS PDFFlow as a library to just create a document. It is rather a page making API that you can use in your application. We provide a big chunk of functionality that you would expect in applications like Adobe InDesign minus the user interface. This approach takes a load off of developer's shoulders allowing them to concentrate solely on the business needs. It improves code readability and supportability, decreases the chances of defects or other mistakes, saves time and money.

PARAGRAPH 2: What differs GS PDFFlow Library from any other PDF generation library out there?Any library that is available on the market right now would be a direct competitor to Haru we base GS PDFFlow Library on. Don't think of GS PDFFlow as a library to just create a document. It is rather a page making API that you can use in your application. We provide a big chunk of functionality that you would expect in applications like Adobe InDesign minus the user interface. This approach takes a load off of developer's shoulders allowing them to concentrate solely on the business needs. It improves code readability and supportability, decreases the chances of defects or other mistakes, saves time and money.

PARAGRAPH 3

header1	header2
cell1	cell2 Hello world!!!!

I like dogs.

header1		header2
cell1		cell2
Inner header 1	**Inner header 2**	
Inner cell 1	Inner cell 2	
		Hello world!!!!
